

Simple, Secure SAML Authentication in PeopleSoft

Enable Seamless, Secure User Authentication

Pathlock provides the **ONLY** turnkey solution to natively integrate SAML-based Single Sign-On Identity Providers in PeopleSoft

Today's most popular Identity providers such as Azure, OKTA, Ping, ADFS and Shibboleth all use SAML standards. With no customizations or additional servers, Pathlock integrates SAML seamlessly with PeopleSoft. There has never been a faster and more cost-effective path toward a successful PeopleSoft SSO project.

Any User, Any Device, Any SSO Identity Provider

Deliver seamless PeopleSoft access to all users on any device using existing SAML-based identity Providers

Improve Productivity Reduce Costs Secure Passwords

Include PeopleSoft in enterprise wide SSO initiatives to realize the benefits that single sign-on delivers.

Rapid Deployment Easy Integration Code-Free Configuration

Deploy the PeopleSoft SAML add-in as quick as 7 days with no additional hardware or custom coding

Improve Productivity

- Offer a seamless login experience for end-users
- Reduce employee downtime from password related problems
- Use deep/embedded links for quick navigation
- Centralize user provisioning

Reduce Costs

- Drastically reduce password reset support costs
- Leverage investment in existing SSO providers
- Reduce maintenance and support costs versus a custom developed SSO solution

Increase Security

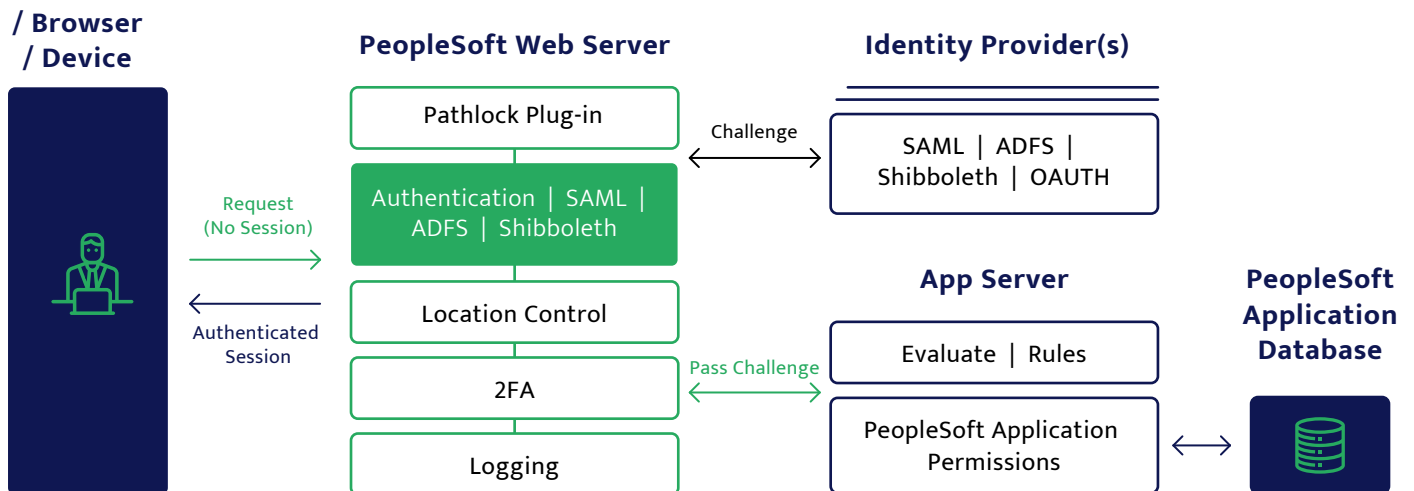

- Quickly provision and deprovision users across all enterprise applications
- Align to compliance requirements
- Implement strict password management policies in PeopleSoft enforced by your IdP
- Reduce password fatigue that leads to weak passwords and risky practices (no sticky notes!)

Achieve SAML SSO Authentication Natively Inside PeopleSoft

Zero Coding. No Specialized Knowledge Required. No Additional Web Server or Hardware.

Pathlock PeopleSoft SSO	Custom Development
IMPLEMENTATION <ul style="list-style-type: none">Go-live in as little as 7 daysBrowser-based configuration of your IdP's SSO in PeopleSoftNo additional hardware or custom development requiredSupport multiple IdPs concurrently for consolidated systems with separate user groups	IMPLEMENTATION <ul style="list-style-type: none">Custom coding requiring specialized knowledgeOften requires additional hardwareSpinning up and connecting additional webserver with current environment
MAINTENANCE <ul style="list-style-type: none">Add-in is independent from PeopleSoft/PeopleTools updatesStable, tested product used in hundreds of PeopleSoft environments with minimal maintenanceFixed maintenance schedule with fixed costs	MAINTENANCE <ul style="list-style-type: none">Additional workload for application management and development teamsOften fragile with continuous maintenance requirementsRisk of runaway costs; TCO can grow into uncertainty
SUPPORT <ul style="list-style-type: none">Full support team available 24/7 to assist with any challengesUpdated software packages made available to customers with each PeopleSoft update	SUPPORT <ul style="list-style-type: none">No standardized support modelRequires highly technical skillsets familiar with the customization

Pathlock's PeopleSoft SSO Connector Runs INSIDE the Web Server for Unmatched Simplicity and Native SAML and Functionality.

About Pathlock

The Pathlock platform protects the leading ERP systems and enterprise business applications and the critical transactions they power. Our application governance solutions help companies enforce GRC controls and take action to prevent loss. Enterprises can manage all aspects of application governance in a single platform, including user provisioning and temporary elevation, ongoing user access reviews, control testing, transaction monitoring, and audit preparation.
